

### *Personal invitation to the AACII Congress*

*The Nuremberg Nicolaus Copernicus Planetarium is the largest planetarium in Bavaria and one of the first of its kind in the world. Millions of visitors have already visited one of the diverse fulldome shows. The 360 degree dome projections convey exciting information about the cosmos. This new technology also fascinates our younger generation.*

*As part of the AACII Congress, we will visit this planetarium and invite you personally on Wednesday 6 July 2022 at 2 p.m. For this we ask for your answer and registration.*

*The tour begins at 2 p.m. at the information stands on the subject of aerospace from important regional and international exhibitors with unique exhibits. The culinary refreshments from the Can family, Restaurant Mevlana, spoil the guests. Gostenhof, formerly Gastenhof, is known for its great hospitality and intercultural connections.*

*2.30 pm Welcome of the participants by and with official high-ranking personalities. The uniqueness of innovations that help shape the future of all of us is explained.*

*Prof Dr Klaus Wübbenhorst, as economics chairman of the EMN metropolitan region of Nuremberg, will present interesting perspectives for the European metropolitan region.*

*We are looking forward to your visit. You are welcome!*

*With best regards and wishes*

Yours Ulrike Trapp
