

AACII AEROSPACE MOBILITY NEWS 2022.2

THE AACII GLOBAL AWARD

With the AACII Global Award, the expert jury honors personalities who understand it to explain complex matters in a comprehensible way and thus, build a bridge between science and the public. Few have the eligibility, and this is particularly true in aerospace. But especially in these future sectors these competences are essential.

This is precisely why your application as a candidate is an important contribution. An attractive monetary reward awaits the winner, and every candidate receives great benefits. Anyone who can present their contribution to aerospace technologies here has great opportunities. In addition to the invitation as guest of honor for the AACII Congress with many regional and international decision-makers from science, technology, industry and economy, media attention awaits him or her. The AACII Global Award will be presented on Tuesday, July 5, 2022 in Nuremberg's Meistersingerhalle, The Hall of Champions, during the presentation ceremony by the President of the University of Erlangen-Nuremberg, Dr Ing Joachim Hornegger. More information and the registration form await you down below and on the website www.aacii.space

To promote presentations of complex interrelations in a comprehensible way as excellent asset in the aviation and aerospace sector. The promotion of junior scientists is the target of the AACII 2022.

Deadline: 30th of April 2022

Criteria for candidates to be nominated for the Global Award AACII 2022:

In the sense of best concept, best impact, and best performance the most excellent paper will be a contribution to...

A) inspiring junior scientists and preparing them for thrilling jobs in the aviation and aerospace sector.

B) interested parties or groups that have expressed their appreciation and state that they now understand interrelations which were not clear to them before

C) supporting the credo: „To protect the environment on earth, science from aerospace is necessary.“

The work is described in an extra document as annex. The length of the document should be between two and four pages.

The jury of the AACII Global Award 2022 selects the candidates for nomination.

Members of this body are prominent representatives of business, science and research with relevant competence and experience.

Categories:

1. Research in aviation and aerospace
2. Surveillance (for instance weather, geology, archeology)
3. Telecommunication and telemetry
4. Navigation
5. Satellite technology
6. Transportation and power units
7. Life in space and learning effects for life on earth
8. Zero gravity and synergies for applications on earth
9. Robots and artificial intelligence
10. Informatics in aviation and aerospace

The following documents need to be attached in the annex:

Personal data sheet with photo and passport copy

The work submitted

Letter of motivation to deal with the subject

List of publications

Application form signed

Changes by the jury of the AACII are possible.

Legal process is excluded. Misrepresentations will result in exclusion from the competition or dispossession of the award.

Transmittal of the documents means that the modalities are accepted.
